| Singal, M. K. and Ram Behari | | Generalization of normal curvature of a curve in a Riemannian $V_n$, 309. |
| Srinivasan, R. | .. | Thermal expansion of potassium iodide, 255. |
| | .. | The thermal expansion of calcite from room temperature up to 400° C., 81. |
| Subrahmanya, R. S. | .. | Polarographic behaviour of thionates, 267. |
| Sundaramma, Miss K. | .. | Paramagnetic resonance in some cupric salts, 292. |
| Sundaramurthy, V. | .. | *See* Rao and Sundaramurthy. |
| Tillu, Mahadeo, M., Bhatnagar, D. V. and Murthy, T. K. S. | | Colorimetric estimation of uranium with ammonium thiocyanate and its application to determination of uranium in minerals particularly monazite concentrates, 28. |
| Vadehra, K. L. | .. | *See* Sehgal and others. |
| Venkataraman, K. | .. | *See* Bapat and Venkataraman. |
| Venkatesan, D. and Shastry, T. S. G. | | Effect of lunar atmospheric tide on the meson intensity at Kodaikanal, 204. |
| Viswanathan, K. S. | .. | *See* Raman and Viswanathan. |

## TITLE INDEX

Absorbing biaxial crystals, the propagation of light, I, II (Pancharatnam), 86, 235.

Antitubercular compounds, potential, III (Bapat and Venkataraman), 336.

Benzopyrone series, synthetic experiments, LV (Sehgal and Seshadri), 36; LVI (Mehta and Seshadri), 192; LVII (Sehgal and others), 252.

Collagen, studies, I (Ramachandran and Kartha), 215.

Corrigenda, 163.

Cuticles of arthropods, studies (Santhanam), 142.

Diffraction of light by progressive and standing supersonic waves (Mertens), 195.

Diffusion, studies, I (Aswathanarayana and Ramamurthy), 71.

Elastic behaviour of isotropic solids (Raman and Viswanathan), 1.

Elastic constants of some cubic crystals, four, evaluation (Raman and Krishnamurti), 111.

Elasticity of crystals, on the theory (Raman and Viswanathan), 51.

Hausdorff transformations for double sequences (Ramanujan), 131.

Heterocyclic compounds, VI (Krishnan), 289.

Ingham summability and summability by Lambert series, a note (Rajagopal), 41.

Intensity measurements of ultrasonic diffraction orders (Rao), 158.

Isoquinoline series, studies, I, II (Govindachari and Nagarajan), 136, 261.

Mariposite from Belvadi, Mysore State (Naidu and Khan), 153.

Meson intensity at Kodaikanal, effect of lunar atmospheric tide (Venkatesan and Shastry), 204.

$\tau$-mesons, analysis (Goel and Neelakantan), 22.

Normal curvature of a curve in a Riemannian $V_n$, generalization (Singal and Ram Behari), 309.

Paramagnetic resonance in some cupric salts (Sundaramma), 292.

Phloroglucinol derivatives, C-methylation (Jain and Seshadri), 279.

Physiologically active compounds, search, I (Rao and Sundaramurthy), 249.

Raman frequencies of methyl and ethyl benzoates and ethyl cinnamate, assignment (Puranik), 326.

Raman spectra of nickel sulphate crystals (Krishnamurti), 77.

Raman spectra of the hydrocarbon cyprene, II (Hariharan and Senich), 285.

Raman spectrum of cesium bromide (Narayanan), 303.

Sound absorption coefficients based on intensity measurements of diffraction orders (Rao), 331.

Tamarind seed jellose, acetylation (Rao and Beri), 199.

Thermal agitation in crystals, the nature (Raman), 163.

Thermal expansion of boric acid (Lonappan), 10.

Thermal expansion of calcite from room temperature up to 400° C. (Srinivasan), 81.

Thermal expansion of potassium iodide (Srinivasan), 255.

Thermal neutron distribution due to time-dependent fast neutron sources in non-multiplying media (Iyengar and Mani), 175.

Thionates, polarographic behaviour (Subrahmanya), 267.

Thorium, spectrophotometric estimation, by morellin (Rao and Patel), 317.

Uranium, colorimetric estimation, with ammonium thiocyanate and its application to determination of uranium in minerals particularly monazite concentrates (Tillu and others), 28.
